

# Makin' Copies is easier than ever!

## Cedar Desktop CD-R Publisher 4000

*Loads, cleans, records, verifies and prints up to 50 CDs automatically.*

### Now you can afford a CD-R Publishing System

The incredible Desktop CD-R Publisher from Cedar Technologies brings automatic CD production within reach for businesses of all sizes. It's now possible to turn out professional-looking CDs in minutes, for a fraction of the cost of using outside services. The integrated color printer produces discs that look as good as silk-screening and the 12x recorder(s) make short work of big jobs. The rugged robotics are engineered for long, trouble-free service, and the patented disc cleaning system helps insure reliable mastering.

### Innovative Design

The Publisher consists of two 50-disk CD Holders™ nested in a motorized In/Out drawer, four drive bays which accommodate standard CD recorders, a disc cleaning system, a reject drawer, a color CD printer and the Cedar robotics unit, arrayed in a vertical "tower" configuration. The robotics are linked to our proprietary SCSI controller; every aspect of operation is software controllable. Front panel controls allow manual operation of the Reject drawer, the Input/Output drawer, and the robotic "picker". Sensors verify disc position to insure smooth operation and gentle disc handling.

### Powerful Software for Maximum Results

The Cedar Publisher includes full-featured mastering software for Windows 95, 98, NT or Macintosh computers. The included CD Face application allows you to design and edit disc labels, and offers sophisticated printing features like serialization and custom data fields.

### So Much To Do, So Little Time

Whether you need 50 copies of your newest musical masterpiece to send to the record companies, or you need to create small batches of custom CDs but don't want them to look "hand made", the Cedar Desktop CD-R Publisher is for you. Contact your Dealer or Cedar Technologies to get the whole story!
