

CD-R and DVD-R Thermal Color Printing

The Aurora is a high performance, cost effective CD-R and DVD-R Thermal Color Printer that incorporates the ingenuity of MicroBoards Technology's Champion Series of CD and DVD publishing systems. With its ruggedized external casing, fast print speed, and ease of operation, the Aurora offers users unmatched printing capabilities for 120 mm optical storage and interchange media (CD / DVD). Most importantly, Aurora's unique thermal transfer printing technology allows users to create high resolution, colorful graphics on most standard lacquer finish CD-R and DVD -R discs. No special printable surface is required. Software included with the system provides PC users with powerful design tools to promote your business or content. Aurora is perfect for most CD-R and DVD-R printing applications including Pro Audio, Multimedia, Government / Education, Software Development, Data Distribution, and many others. Call your MicroBoards Technology Account Manager for details.
